The Media Connectivity Association

Standards and Software for Connected Media Experiences

5G-MAG Association

Activity recap

March 2026

Reach out for more information at info@5g-mag.com

5G-MAG, The Media Connectivity Association

Standards and **Software** for **Connected Media Experiences**

Media Applications
Content **delivery**, **production**, **immersive** media experiences,...

Connectivity
5G networks, **APIs**, **computing**, **devices**, **protocols**,...

Standards
fostering **scalability**, **interop,** trust

5G MAG The Media Connectivity Association

Open-Source
adoption testing **collaboration** efficiency

Industry Collaboration
under a neutral, hands-on
non-for-profit industry association

Our Work in 3 steps

Pre-Standardization

- Collaboration scenarios
- Reference use cases
- Market-driven requirements

Supporting Standards Development

- Feasibility studies and profiles
- Feedback to standards
- Implementation guidelines

Post-Standardization

- Open-source Software
- Standards validation
- Prototypes, trials, ecosystem-drive

Standards and **Software** for **Connected Media Experiences**

Our Current Technology Topics

- Streaming, Media Delivery and Data Collection
- 5G Broadcast for TV, Radio and Emergency Alerts
- Multicast and Broadcast Services in 5G Networks
- Non-Public Networks for Content Production
- Network Capability Exposure though Network APIs
- Non-Terrestrial Networks for Content Delivery
- XR: 3D Scenes and Avatar Communications
- Volumetric Video and Beyond 2D Video Experiences
- Getting ready towards 6G Media

5G-MAG Reference Tools Developer Community

Transforming specifications into reference implementations

5G MAG REFERENCE < TOOLS />

Bringing **specs** to **life**

- Standards validation, interop, early prototyping and testing
- Ready-to-use code in production environments and as benchmark
- Shared development effort avoids duplication across companies
- Transparency, trust and collaborative enhancements

Structure

Member-driven
Bottom-up work and topics

Minimum bureaucracy
to concentrate on the actual work

Maximizing efficiency
by limited telcos & on-line work

Contribution-driven
to ensure relevance of the work

General Assembly
(All members)

Steering Group
(elected by members)

WG TECH
Members' Workgroup
Technology & Standards

WG DEV
Members' Workgroup
Development & Ecosystem-drive

WG PC
Members' Workgroup
Promotion & Communication

FORUM

The Media Connectivity Association

Join us and support the activities!

How does 5G-MAG support the industry and you?

5G-MAG supporting the industry

Driving the development of **open standards** for connected media services

Contributing industry's feedback to SDOs in a coherent way

Supporting open-source software implementations towards products

Accelerating adoption of global **connectivity solutions** for media

Fostering tech interoperability and trust

5G-MAG supporting you

Understanding standards, **specifications** and **technologies**

Creating collaboration opportunities with partners

Contributing consensus-driven requirements to SDOs

Scouting opportunities for projects and funding aligned to 5G-MAG's work

Promoting your work at events
